USING THE LION CLAW™

- The Lion Claw™ provides 10,000 mAh to power your device all day. Built-in ultra-strong magnets “claw” onto your iPhone’s MagSafe connection to wirelessly charge (iPhone 12–16).
- Power other USB-C devices using the included USB-C cable and the input/output port at the bottom.
- The first LED indicator glows blue to indicate wireless discharging and green to indicate fast charging and discharging. The other four LEDs indicate the level of charge remaining.
- Use the power button on the bottom of the unit to power it on and off.
- Recharge the Lion Claw by plugging one end of the included USB-C cable into the input/output port of the Lion Claw, while the other end of the cable is plugged into a power source.

See Overview (reverse page) for more.
